

## LETTER OF RECOMMENDATION

Antoine CRENN has worked for JVEG joint venture between the companies EMCC – France and GEKA - The Netherlands on the following project, held in Dunkerque, France.

Building of the LNG-Terminal:

- Metal piling on and offshore
- Concrete structures installed above
- Metal structures installed on top
- Unload installations

This program is implemented by the engineering of Cofiva, on behalf of The France companies EDF / Total and the Belgian company Fluxis and Financed by them.

The initial value of the project was 45 million Euros.

The Quality works carried out by Antoine CRENN, Assistant Quality Assurance Manager in Dunkerque during all the phases of the project and were performed with high quality and with good results.

- Welding procedures for piling and metal structure
- Painting procedures
- Preparation of final documentation
- Follow up of the execution of the works
- Very good organization of Quality Control procedures
- General quality follow-up

I herewith recommend Antoine CRENN as a competent partner.
