

JEAN-MICHEL MAGUIN

Profile

Having graduated from the ESIEA engineering school, I have 5 years' experience in the IT sector, as a consultant and project manager. I have been an aviation enthusiast since I was a child, and started flying at the age of 15. I passed my ATPL at the same time as pursuing my IT employment and started my full-time professional training at CAE Oxford Aviation Academy early this year. My training completed, I am now looking for an opportunity to start a successful career in aviation.

Aside from my technical qualifications, I pride myself in keeping a professional manner and know the importance of safety and customers coming first. Through my professional background and associative activity, I demonstrated responsibility and leadership skills and developed the ability to work as part of a team. These skills, combined with my diligent work ethic and positive mindset, are in line with the qualities an airline is seeking for their pilots.

Please visit my website and contact me to hear more about my profile and training records.
