

Twinkle, Little Star

Shine bright like a diamond. Cast some Forget-Me-Nots over the sea of red lips and blow-dried waves.

Purple Rain

Experiment your heart out – this masquerade is all the drama you need. First, cover the skin you want bare with tape. Then dust the glitter onto your skin, and peel away the tape. *Voilà*, a masterpiece.

Envy Me

Switch up the usual eyelid art and reverse your look with these ombre emerald wings. For defined lines, mark out your shape with a white pencil liner, and fill in from there.

Blue Steel

Turn your winged liner Insta-worthy with mirrored streaks of shimmer. Make it stay in place by using a balm or sticky gloss. Clean up the excess with a cotton bud.

Gilded Edge

Bronze shades work great with warmer skin tones. Harmonise the look with a contour in the same colour family, then add dimension with a lighter third shade directly on the centre of the lids.
