To Whom It May Concern:

This is to certify that Simon Daguene completed 6 months work experience for Computer Doctor in 2013 from July-December.

Simon created a Java application for one of our clients in Dublin. He contacted the customer and asked what their needs were. He then built the Java application which was linked to a database. He presented the application to the client weekly and would change it accordingly.

In the 6 months working with Simon, I found him honest, helpful, punctuate, trustworthy, friendly, independent and very competent. He worked very well with others.

While Simon was on work experience, his English improved dramatically.

Above are reasons why we strongly recommend the services of Simon. We are convinced that his skills and experience will be an asset for any company.

I would have no problem in recommending Simon for any post/position.

If you have any problems please do not hesitate to contact me.

CEO Computer Doctor
